Practical 8

Using CSS

a. Create a class called income, and make it a background color of #0ff.
b. Create a class called expense, and make it a background color of #f0f.
c. Create a class called profit, and make it a background color of #f00.
d. Throughout the document, any text that mentions income, expenses, or profit, attach the appropriate class to that piece of text.
e. Further create following line of text in the same document: The current price is 50₹ and new price is 40₹

index.html

```

<head>

    <title>CSS Classes Example</title>

    <style>
        body {
            font-family: Arial, Helvetica, sans-serif;
            background-color: #f4f4f4;
            margin: 40px;
            line-height: 1.8;
        }

        h1 {
            color: #003366;
            text-align: center;
        }

        .container {
            background: white;
            padding: 25px;
            border-radius: 10px;
            box-shadow: 0px 0px 10px lightgray;
        }

        /* Classes */
```

```
    .income {
        background: #0ff;
        padding: 3px 8px;
        border-radius: 5px;
        font-weight: bold;
    }

    .expenses {
        background: #f0f;
        padding: 3px 8px;
        border-radius: 5px;
        color: white;
        font-weight: bold;
    }

    .profit {
        background: #f00;
        color: white;
        padding: 3px 8px;
        border-radius: 5px;
        font-weight: bold;
    }

    .price {
        font-size: 22px;
        margin-top: 25px;
    }

    .oldprice {
        color: red;
        text-decoration: line-through;
        font-weight: bold;
    }

    .newprice {
        color: green;
        font-size: 28px;
        font-weight: bold;
    }
</style>
```

```
</head>

<body>

    <div class="container">

        <h1>Business Report</h1>

        <p>

            Every business aims to increase its
            <span class="income">Income</span>
            while reducing
            <span class="expenses">Expenses</span>.
            When the income is greater than the expenses,
            the company earns a
            <span class="profit">Profit</span>.

        </p>

        <p>

            Proper financial planning helps in increasing
            <span class="income">Income</span>,
            controlling
            <span class="expenses">Expenses</span>,
            and maximizing
            <span class="profit">Profit</span>.

        </p>

        <p class="price">

            The current price is

            <span class="oldprice">50₹</span>

            and new price is

            <span class="newprice">40₹</span>

        </p>
```

```
    </div>

</body>

</html>
```

Practical 9

Using CSS

a. Change the tag li to have the following properties:
    i. A display status of inline
    ii. A medium, double-lined, black border
    iii. No list style type
b. Add the following properties to the style for li:
    i. Margin of 5px
    ii. Padding of 10px to the top, 20px to the right, 10px to the bottom, and 20px to the left

index.html

```
<!DOCTYPE html>

<html>

<head>

    <title>CSS List Styling</title>

    <style>
        body {
            font-family: Arial;
            background: #f2f2f2;
            margin: 40px;
        }

        .container {
            width: 500px;
            margin: auto;
            background: white;
            padding: 25px;
            border-radius: 10px;
            box-shadow: 0px 0px 10px gray;
        }

        h1 {
            text-align: center;
            color: #003366;
        }
```

```
        ul {
            padding: 0;
        }

        li {
            display: inline;
            border: 2px double black;
            list-style-type: none;
            margin: 5px;
            padding: 10px 20px 10px 20px;
            background: #d9f3ff;
            border-radius: 6px;
            font-weight: bold;
            color: #003366;
        }

        .note {
            margin-top: 30px;
            color: #444;
        }
    </style>

</head>

<body>

    <div class="container">

        <h1>Programming Languages</h1>

        <ul>

            <li>HTML</li>

            <li>CSS</li>

            <li>JavaScript</li>
